

# Simplifying Engineering Designs for Modern Building Professionals

## Accurate Building Services Calculations you can count on every time.

## 3 Key Value Outcomes

-  Gain Peace of Mind
-  Save Time
-  Save Money

## We don't just care about software

We care about making the world a better place just like you.

-  Over 6000 happy customers
-  Millions of calculations computed
-  38 years of trusted partnerships with engineers across Australia and the globe

Modern building designs are constantly evolving making it harder to design the perfect building system. With so many components, analysing the big picture is really complex. With HYENA<sup>+</sup> you can calculate and size fire protection systems easily with total peace of mind. HYENA<sup>+</sup> simplifies fire sprinkler and fire system design when you use the industry's trusted gold standard.

## Building design doesn't have to be so complicated

Engineering the right Building Services is complex. So many factors and calculations require total precision.

## Do more of the work you love with a trusted software partner

### Size the Right System every time

Calculating loads, systems, and selecting equipment requires precision

### Optimise Performance & User Experience

Balance end user needs with peak efficiency to deliver sustainable performance

### Take your Time back

Spend less time in endless calculations and inputting data, and trust ACADS-BSG to deliver the results you need

## HOW IT WORKS

- 1 Visit the website  
<https://www.acadsbsg.com.au/hyena-plus/>
- 2 Sign up for an annual subscription
- 3 START HYDRAULICALLY CALCULATING!

## Design building systems with ease

With over 6000 customers using ACADS-BSG tools every day, our communities are being transformed with new and often complex buildings all the time. With the right tools, sizing the right systems that deliver safety, performance, and efficiency has never been quicker and easier.
